## **Introduction**

While coronavirus (COVID-19) remains in the community, this means making judgments at a school level about how to minimise any risks from coronavirus, while providing a full education for our pupils, requires careful thought. This risk assessment will underpin our approach.

## **Information to Note**

### Contacts

- A **'contact'** is a person who has been close to someone who has tested positive for COVID-19 anytime from 2 days before the person was symptomatic up to 10 days from onset of symptoms (this is when they are infectious to others). For example,
  - people who spend significant time in the same household as a person who has tested positive for COVID-19
  - sexual partners
  - a person who has had face-to-face contact (within one metre), with someone who has tested positive for COVID-19, including:
    - being coughed on
    - having a face-to-face conversation within one metre
    - having skin-to-skin physical contact
  - a person who has been in contact within one metre for one minute or longer without face-to-face contact
  - a person who has been within 2 metres of someone who has tested positive for COVID-19 for more than 15 minutes
  - a person who has travelled in a small vehicle with someone who has tested positive for COVID-19 or in a large vehicle or plane near someone who has tested positive for COVID-19
- The key is **THE BUBBLES MUST NEVER MIX** and should keep to their own spaces wherever possible

### Lockdown January 2021

Due to high levels of community transmission, schools are open for vulnerable and offspring of critical keyworkers only. The majority of the pupils will be educated remotely.

Face Masks	Spreading Covid-19	Everybody	<p>Due to high levels of community transmission staff will wear face coverings at all times, apart from when eating meals and drinking. Staff and pupils have been shown how to don and doff face coverings correctly and the limitations of their protection. Please note the following summary guidance on effective wearing of face coverings:</p> <ul style="list-style-type: none"> <li>Face coverings are for the protection of those around the wearer, as they help to reduce the aerosol spread caused during breathing and speaking. Where they are close fitting, they may also provide a limited protection benefit to the wearer (this has yet to be proven).</li> <li>Staff and pupils will need to have at least two face coverings each day at school, as they may only be worn once. Once taken off the face covering must be stored in a plastic bag that is separate from the clean face coverings</li> <li>Hands must immediately be sanitised before putting on and after taking off a face covering</li> <li>A face covering is only effective if it covers all the breathing zone, e.g. the nose and mouth</li> <li>Only touch the straps of the face covering</li> <li>Hand sanitisation and social distancing controls must remain in place at all times, as they are more effective at preventing spread of the virus than the controls of wearing a face covering</li> </ul>	Ongoing	All adults on site	Low

General cleaning – classrooms/office spaces/staff room.	Spread of virus in asymptomatic carriers or anyone with early symptoms.	Everybody	<p>From the research and evidence, the virus can be disposed of using hot soapy water and household detergent. Site supervisors should ensure that supplies of household detergent are kept high and always available.</p> <p><b>Cleaning and disinfection</b> Regular cleaning plays a vital role in limiting the transmission of COVID-19.</p> <p>Reducing clutter and removing difficult to clean items can make cleaning easier. Increase the frequency of cleaning, using standard cleaning products such as detergents, paying attention to all surfaces but especially ones that are touched frequently, such as door handles, light switches, work surfaces, remote controls and electronic devices.</p> <p>As a minimum, frequently touched surfaces should be wiped down at the beginning and at the end of each day, and more frequently depending on: the number of people using the space, whether they are entering and exiting the setting, and access to hand-washing and hand-sanitising facilities. Cleaning of frequently touched surfaces is particularly important in bathrooms and communal kitchens.</p> <p>When cleaning surfaces, it is not necessary to wear personal protective equipment (PPE) or clothing over and above what would usually be used.</p> <p>Cleaning products to be stored and used correctly and remain inaccessible to children.</p> <p>Daily:</p> <ul style="list-style-type: none"> <li>Cleaners to wipe down all surfaces with disinfectant spray.
